UL Solutions Built Environment

We provide training, advisory services, testing, verification, inspection and certification services for the fire resistance industry to help you get compliant products to market faster.

- Dampers
- Door hardware/frames
- Doors
- Firestops and joints
- Record protection
- Structural steelwork protection
- Windows

Prefabricated and Modular Construction

- Off-site construction using assembly line methodology
- Construction components delivered on-site for final preparation and assembly
- Expected to be 100+ billion-dollar global industry by 2028

Scope and Scale

- Construction components delivered on-site can range from panels, modules or entire units
- Kitchens
- Bathrooms
- Meeting pods
- Bedrooms / Sleep pods
- Complete buildings

Benefits

- Reduction of on-site assembly from months to days, or even hours
- Estimated to provide up to 35% costs advantage in time savings
- Elimination of weather delays
- Greater control over service and contractor alignment
- Significant improvement in delivery and hand-over commitments

Challenges

- Reduced ability for on-site inspections
- Limited access to concealed construction elements
- Greater reliance on third party validation of compliance
- Variation in quality and detail of supporting evidence

Learnings from past practice

Pre-fabricated appliances and furniture with electrical and plumbing connections have been part of our market for many years – what can we learn from them?

Standardized approach to compliance

In North America, The International Code Council and The Modular Building Institute have been collaborating since 2019 on the development of standards:

- Planning, Design, Fabrication and Assembly
- Inspection and Regulatory Compliance
- Mechanical, Electrical, Plumbing Systems, Energy Efficiency and Water Conservation (*in process*)

Further opportunities around sustainability are also expected to become a focus.

Modular Building Inspection

- Inspection conducted at site of manufacturer and/or assembly
- Inspection covers all applicable codes and standards
- Each modular unit inspected and issued a unique identification number

 **UL MODULAR
BUILDING INSPECTION PROGRAM**
Compliant

File Number: 4789465038 **Client unit #**

Date of Inspection: 11/09/2020
